Bridge Pro

WEEE & Recycling Information

HW Rev 1

About This Document

This document explains how to recycle or dispose of the Bridge Pro (HW Rev 1) at the end of its life. It covers the European Union Directive 2012/19/EU on waste electrical and electronic equipment (WEEE), the United Kingdom WEEE Regulations, and recycling options in the United States and Canada.

Electronic equipment must not be thrown away with household waste. Collecting it separately allows the metals, plastics and other materials in it to be recovered, and keeps the substances it contains out of landfill.

Product Identification

Product name	Bridge Pro
Hardware revision	HW Rev 1
Manufacturer	ScoreScrape
Model / part number	SS-Bridge-Pro
Supplied accessories	OA-FW4006 2.4 GHz FPC antenna; 5 V USB Type-C power supply
WEEE category	Category 6, small IT and telecommunications equipment (Directive 2012/19/EU, Annex III)
Batteries	None

The WEEE Symbol

The crossed-out wheeled bin symbol on Bridge Pro, its packaging and this document means that the product must be collected separately from household waste at the end of its life. The bar beneath the bin shows that the product was placed on the market after 13 August 2005.

How to Dispose of Bridge Pro

Before you recycle

- Perform a factory reset, as described in the Factory Reset section of the user manual. This removes your Wi-Fi credentials and network settings from the device.
- Disconnect the device from power and from the network.
- Keep the antenna and power supply with the device so they can be recycled together.

Where to take it

- **Local collection point.** Take the device to a municipal recycling centre or electronic waste collection point. Your local authority can tell you the nearest one.
- **Retailer take-back.** In the EU and UK, retailers that sell electrical equipment must take back an old device when you buy an equivalent new one. Large electronics retailers must also accept very small equipment (no side longer than 25 cm), such as Bridge Pro, free of charge without a purchase.
- **Return to ScoreScape.** Please email weee@scorescape or fill out the contact form on the ScoreScape website at <https://scorescape.io/contact> indicating you would like to return your Bridge Pro for disposal.

Packaging

Recycle the cardboard box and paper inserts with paper and card. Recycle plastic bags and foam according to your local recycling rules.

Health and the Environment

Bridge Pro contains electronic components, solder, circuit boards and cables. If the device is broken up or burned without proper treatment, substances in these materials can be released and harm human health and the environment. Separate collection sends the device to authorised treatment facilities, where these substances are removed safely and the materials are recovered for reuse.

By returning Bridge Pro for recycling, you help meet the collection and recovery targets set by the WEEE Directive.

United Kingdom

Bridge Pro is covered by the Waste Electrical and Electronic Equipment Regulations 2013 (SI 2013/3113). Use a local recycling centre or a retailer take-back service as described above.

United States and Canada

There is no national WEEE law in the United States, but many states have electronics recycling laws or bans on putting electronics in landfill. Contact your local waste authority for collection options, or use an electronics recycler certified to the R2 or e-Stewards standard.

In Canada, provincial and territorial programmes collect electronics at drop-off locations, often at no charge. Contact your provincial programme or local municipality for the nearest location.
